## IMPORTANT SAFETY INSTRUCTIONS

When using your telephone equipment, basic safety precautions should always be followed to reduce the risk of fire, electric shock and injury to persons.

1. Read and understand all directions.
2. Follow all warnings and instructions.
3. Unplug this product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning.
4. Do not use this product near water.(i.e. Near a bathtub, kitchen sink, washing machine, in a wet basement, or near a swimming pool. Avoid spilling liquid on the product.
5. Do not place this product on an unstable cart, stand, or table. The product may fall, causing serious damage to the product.
6. Do not allow anything to rest on the telephone cord. Do not locate this product where the cord will be abused by persons walking on it.
7. Never put foreign objects of any kind into the product as they may touch dangerous voltage points or short out parts that could result in a risk of fire or electrical shock.
8. To reduce the risk of electric shock, do not disassemble this product, Take it to a qualified service person if service or repair work is required. Opening or removing cover may expose you to dangerous voltages or other risks. Incorrect reassembly can cause electric shock when the appliance is used.
9. Adjust only the controls that are covered by the operating instructions. Improper adjustment of controls may result in damage that could require extensive work by a qualified technician.
10. Refer servicing to qualified service personnel if the following should occur:

When the phone line or plug is damaged or frayed.

If liquid has been spilled into the product.

If the product has been exposed to rain or water.

If the product does not operate normally by following operating instructions.

If the product has been dropped or the cabinet has been damaged.

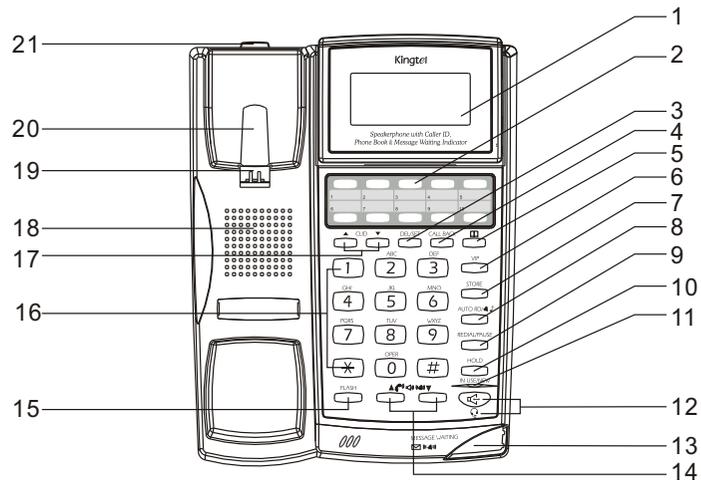

If the product exhibits a distinct change in performance.

11. Avoid using a telephone during an electrical storm. There may be a risk of electric shock from lightning.
12. Do not use the telephone in the vicinity of a gas leak.
13. The handset receiver may retain dangerous materials such as metallic pins and staples because the receiver is magnetic.
